

Portable Cellular Signal Detection for Everyday Operations

Key features

- Detects 2G, 3G, 4G and 5G activity
- Compact handheld design
- Belt holster included
- Adjustable sensitivity controls
- Available with optional directional antenna capability
- Silent vibration alerts for discreet operation
- Audible, visual and haptic notifications
- Pocket-sized for everyday carry

Directional antenna sold separately

Typical applications

- ✓ Prison patrols
- ✓ Cell searches
- ✓ Perimeter checks
- ✓ Security inspections
- ✓ Contraband detection
- ✓ Event security
- ✓ Facility monitoring
- ✓ TSCM operations

Monitor cellular activity and receive instant alerts when devices are detected.

Lightweight and easy to carry, Scout™ helps operators maintain awareness of nearby transmitting devices without interrupting routine duties.

Available configurations

Original SCOUT™

Portable
cellular monitoring

Scout can be worn on a belt or carried in a pocket to provide continuous monitoring for nearby cellular activity.

Vibration, audible and visual alerts notify operators when activity is detected, making Scout ideal for routine patrols, inspections and day-to-day security operations.

Ideal for:

- Security patrols
- Guarding services
- Facility monitoring
- Event security
- Daily operational use

Directional SCOUT™

Adds directional
locating ability

Scout Directional adds an external antenna connection and a handheld directional antenna, enabling operators to investigate detections and narrow down the source of detected transmissions.

By determining signal direction and strength, Scout Directional helps reduce the search area during investigations.

Ideal for:

- Device location
- Incident response
- Targeted searches
- Security investigations
- Follow-up inspections

Key specifications

Detection range	Outdoor range – up to 100 metres* Indoor range – up to 50 metres* *Range differs depending on target signal strength and external factors such as physical environment
Operational frequency range	600 MHz to 4 GHz
Sensitivity	Up to -75 dBm
Alerts	On-screen signal level meter Sound alerts Vibration alerts
Antennas	Original Scout: internal omnidirectional antenna, 600 MHz to 4 GHz. No external antenna port Directional Scout: handheld directional antenna, 600 MHz to 4 GHz. External Omnidirectional Antenna: 600 MHz to 4 GHz, external SMA antenna port
Sensitivity controls	High, medium and low sensitivity settings accessible from user-interface screen Low, medium and high attenuation settings accessible from the information and settings menu

Battery	Internal non-removable, rechargeable Li-ion. Run time: up to 6 hours Charging time: 3 hours
Power input	5V / 2A, 2.1 mm round barrel plug to mains plug Can be used on mains power for continuous operation
Enclosure	ABS with soft plastic grip
Accessories	Belt holster
Dimensions	Width: 80 mm, Height: 120 mm, Depth: 29 mm
Weight	185 grams

Supporting operational security teams across six continents

Scout™ is designed for environments where mobile phones are prohibited or restricted. It provides a quick and practical way to detect nearby phone activity, helping staff enforce policies and carry out routine checks with confidence.
